AFROLINK ADVENTURES

Content Provider Guide

What data to prepare for the website admin — fields, formats, and examples.

For collaborators supplying destination, journey, event, journal, and partner content.

Send content in English and German where marked EN / DE. Images should be HTTPS links (or partner logo static paths). Create Regions first — almost everything else depends on them.

1. Global rules (read first)

- **Order of work:** Regions → Experiences (golf / safari / stays / wellness) → Journeys → Events / Journal / Partners / Banners.
- **Slugs:** lowercase-with-hyphens (e.g. `maasai-mara`). Keep stable once published — they become URLs.
- **Images:** full HTTPS URLs for most content (not laptop file paths). Partner logos use a static path like `images/partners/name.png`.
- **Lists:** one item per line for inclusions, exclusions, room categories, need-to-know notes, facilities, etc.
- **Coordinates:** decimal degrees with up to 6 decimals (e.g. `-1.292066, 36.821945`).
- **Active:** set Inactive to hide from the public site without deleting.
- **IDs:** when linking itinerary activities or related experiences, use the database ID shown in the admin list (numeric).

How content connects

Region is the hub. Accommodations, golf courses, safari destinations, wellness experiences, and golf events all belong to a Region. Journeys (packages) link days to an optional stay, and day activities to golf / safari / wellness records by ID.

2. Region (Destination hub)

Create these first. Powers destination menus, hub pages, and all experience links.

Field	Required?	Format / notes
name_en / name_de	Required	Destination name in English and German
slug	Required	URL key, e.g. maasai-mara (auto from EN name)
country_en / country_de	Recommended	e.g. Kenya
description_en / description_de	Recommended	Hub intro paragraph(s)
meta_title / meta_description	Optional	SEO overrides
Gallery images	Recommended	HTTPS image URL + optional caption EN/DE + order
is_active	Optional	Default: Active

Example

EN name: **Maasai Mara** · DE name: **Masai Mara** · Slug: `maasai-mara` · Country: Kenya

13. How to send content (checklist)

Preferred delivery

- One folder (or Google Drive) per Region.
- Inside: Course / Safari / Stay / Wellness / Event / Journey subfolders.
- Text in Word, Google Docs, or Markdown — clearly label EN vs DE.
- Images as JPG/PNG/WebP (or a sheet of HTTPS image URLs if already hosted).
- For journeys: numbered day list + which stay + which golf/safari/wellness each day references (by name; IDs assigned after upload).
- For partners: logo files + partner names + preferred order.

Per item, please always include

- Official name (+ German name where bilingual)
- Suggested slug (or we generate from English name)
- Parent Region (for experiences & events)
- Hero image + gallery where possible
- Whether it should be Featured and/or Active at launch
